

Learning Bash Scripting in Kali Linux

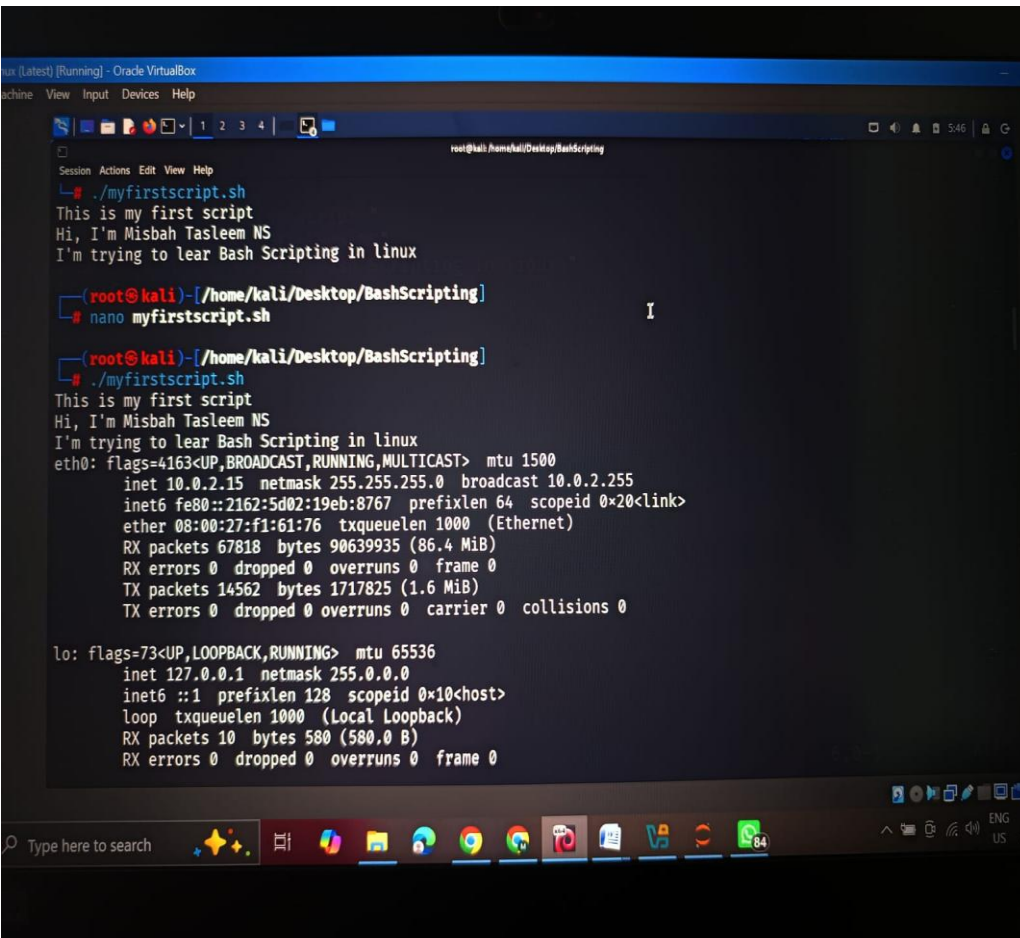

Creating, Executing, and Automating My First Shell Script

Creating My First Bash Script

- Created a dedicated directory for organizing Bash scripts.
- Wrote and executed my first Bash script using nano, chmod +x, and ./myfirstscript.sh.
- Successfully displayed custom output and retrieved network interface details using the ifconfig command.

```
(root@kali)-[/home/kali/Desktop/FileManipulationTasks]
└─$ cd ..
(root@kali)-[/home/kali/Desktop]
└─$ mkdir BashScripting
(root@kali)-[/home/kali/Desktop]
└─$ cd BashScripting
(root@kali)-[/home/kali/Desktop/BashScripting]
└─$ ls
(root@kali)-[/home/kali/Desktop/BashScripting]
└─$ echo "This is my first script"
This is my first script
└─$ ls
└─$ cat BashScripting
cat: BashScripting: No such file or directory
└─$ nano myfirstscript
└─$
```

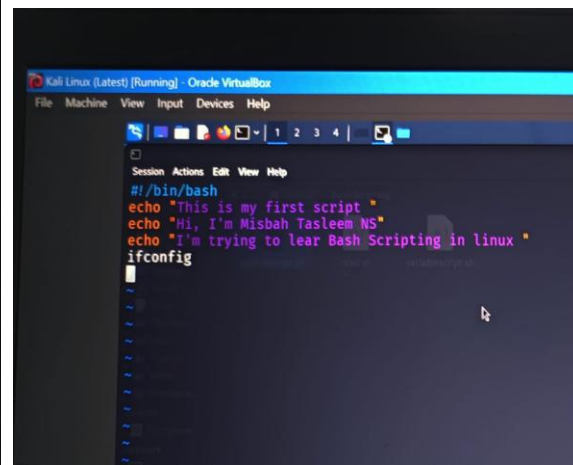

```
(root@kali)-[/home/kali/Desktop/BashScripting]
└─$ ./myfirstscript.sh
This is my first script
Hi, I'm Misbah Tasleem NS
I'm trying to learn Bash Scripting in linux

└─$ nano myfirstscript.sh

└─$ ./myfirstscript.sh
This is my first script
Hi, I'm Misbah Tasleem NS
I'm trying to learn Bash Scripting in linux
eth0: flags=4163<UP,BROADCAST,RUNNING,MULTICAST> mtu 1500
    inet 10.0.2.15 netmask 255.255.255.0 broadcast 10.0.2.255
    inet6 fe80::2162:5d02:19eb:8767 prefixlen 64 scopeid 0x20<link>
    ether 08:00:27:f1:61:76 txqueuelen 1000 (Ethernet)
    RX packets 67818 bytes 90639935 (86.4 MiB)
    RX errors 0 dropped 0 overruns 0 frame 0
    TX packets 14562 bytes 1717825 (1.6 MiB)

lo: flags=73<UP,LOOPBACK,RUNNING> mtu 65536
    inet 127.0.0.1 netmask 255.0.0.0
    inet6 ::1 prefixlen 128 scopeid 0x10<host>
    loop txqueuelen 1000 (Local Loopback)
    RX packets 10 bytes 580 (580.0 B)
    RX errors 0 dropped 0 overruns 0 frame 0
```

```
#!/bin/bash
echo "This is my first script"
echo "Hi, I'm Misbah Tasleem NS"
echo "I'm trying to learn Bash Scripting in linux"
ifconfig
```

Learning Bash Scripting in Kali Linux

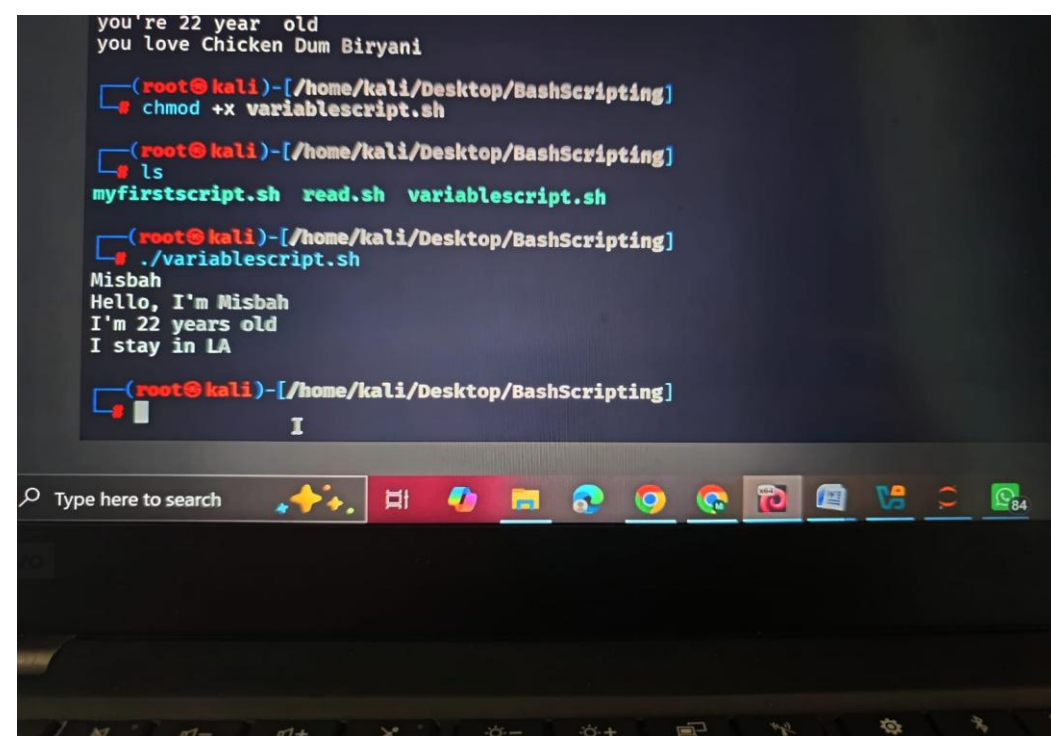

Creating, Executing, and Automating My First Shell Script

```
#!/bin/bash
name="Misbah"
age="22"
city="LA"
echo "$name"
echo "Hello, I'm $name"
echo "I'm $age years old"
echo "I stay in $city"
```

Working with Variables

- Learned how to declare and initialize variables in Bash.
- Stored user information such as name and age in variables.
- Displayed variable values dynamically using the \$ operator with echo.

```
you're 22 year old
you love Chicken Dum Biryani

(root@kali)-[/home/kali/Desktop/BashScripting]
# chmod +x variablescript.sh

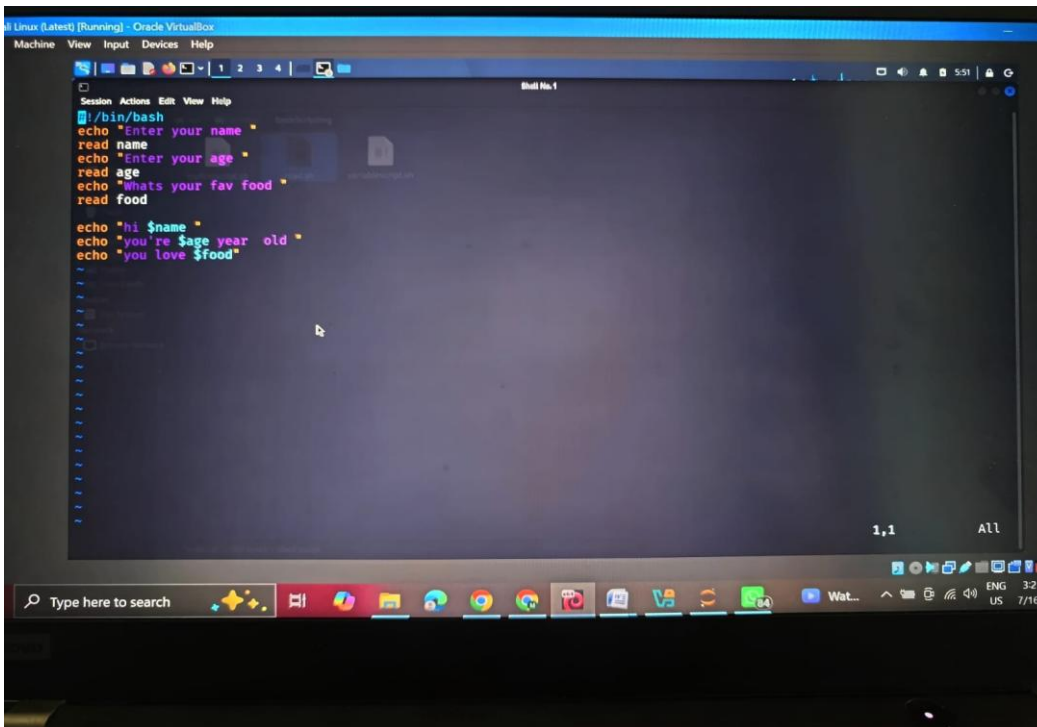

(root@kali)-[/home/kali/Desktop/BashScripting]
# ls
myfirstscript.sh  read.sh  variablescript.sh

(root@kali)-[/home/kali/Desktop/BashScripting]
# ./variablescript.sh
Misbah
Hello, I'm Misbah
I'm 22 years old
I stay in LA

(root@kali)-[/home/kali/Desktop/BashScripting]
#
```

Learning Bash Scripting in Kali Linux

Creating, Executing, and Automating My First Shell Script

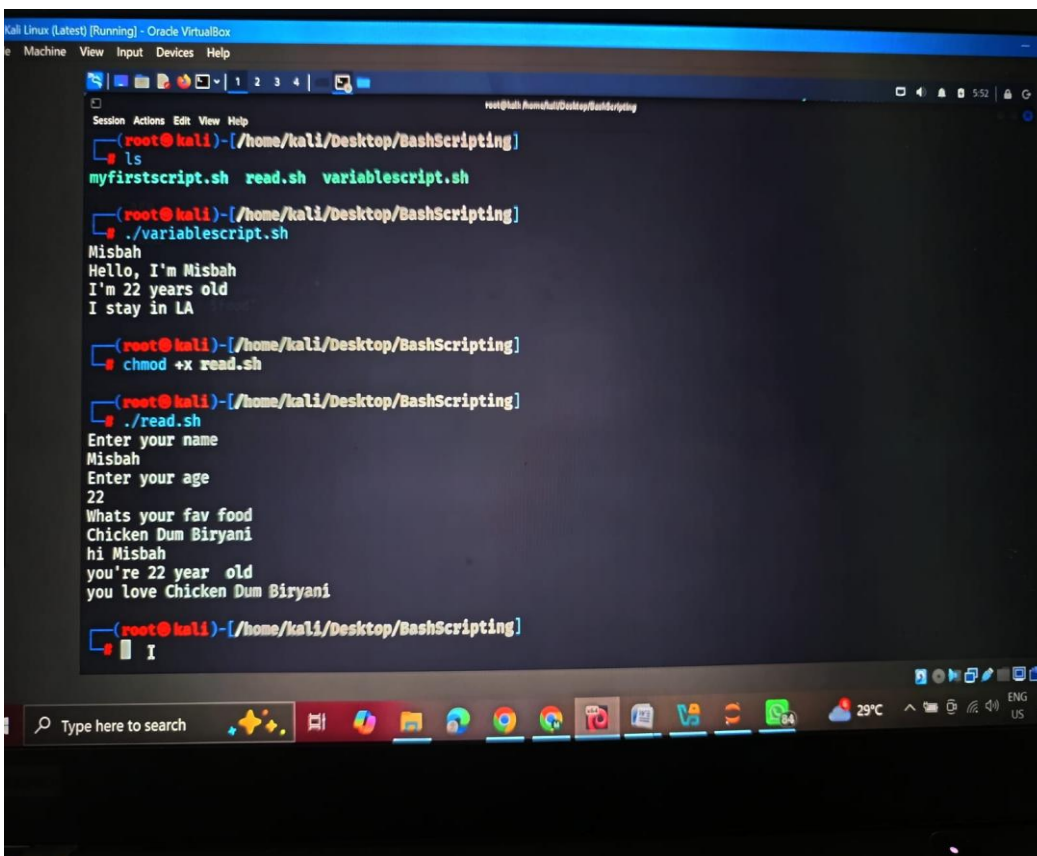

```
#!/bin/bash
echo "Enter your name"
read name
echo "Enter your age"
read age
echo "Whats your fav food"
read food

echo "hi $name"
echo "you're $age year old"
echo "you love $food"
```

Working with User Input

- Learned to accept user input during script execution using the read command.
- Stored the entered values in variables such as name, age, and favorite food.
- Displayed personalized output by retrieving and printing the stored variable values.

```
root@kali:~/Desktop/BashScripting
ls
myfirstscript.sh  read.sh  variablescript.sh

root@kali:~/Desktop/BashScripting
./variablescript.sh
Misbah
Hello, I'm Misbah
I'm 22 years old
I stay in LA

root@kali:~/Desktop/BashScripting
chmod +x read.sh

root@kali:~/Desktop/BashScripting
./read.sh
Enter your name
Misbah
Enter your age
22
Whats your fav food
Chicken Dum Biryani
